Daniel Johansson is a Professor in Mining and Rock Engineering at Luleå University of Technology. He is also the Director of Swebrec, Swedish Blasting Research Centre. The centre's focus is all fields related to blasting; from explosive properties to environmental effects of blasting. He is currently supervisor of 5 PhD students; from blast damage to Mine-to-mill optimization. Additional to this, Daniel is the editor-in-chief of Blasting and Fragmentation journal, reviewer other scientific journals, co-chair of Fragblast12 and member of Fragblast International Organizing committee.
